

RACIST KILLER COPS: GET OFF OUR STREETS!

END POLICE BRUTALITY NOW!

4/25/08 - PSL members protest the acquittal of the cops who murdered Sean Bell in Queens, NY

The arrest of Harvard Professor Henry Louis Gates by Cambridge Police quickly turned racial profiling into a national issue overnight. While the media focused its attention on the “beer summit”, everyday in Black and Latino communities across the country, the police operate as an occupying force – stopping, harassing and brutalizing anyone they wish. Sean Bell, Oscar Grant, Annette Garcia and Kenny Lazo are just a few of the countless victims of racist killer cops, who roam our streets with impunity.

Hear a presentation on the growing epidemic of racial profiling and police brutality and discuss the role of the cops in your community.

THE POLICE & THE STATE: HOW CAN WE WIN?

While social services like health and education are slashed year after year, funding for the police, anti-immigrant forces, and the prison system continually increase. In the last few years, stop-and-frisks, police checkpoints, anti-gang injunctions, and various so-called “neighborhood safety” programs and initiatives have dramatically increased all across the country.

Come hear a revolutionary Marxist perspective on the relationship between the capitalist state and its forces of repression, and how we can build a people's movement to defeat them both.

The role of the police is to protect the interests and property of capitalists.
