

MARCH & RALLY TO STOP THE WARS AT HOME AND ABROAD

Americans want the wars in Afghanistan and elsewhere to end. Instead, the White House has extended and expanded its war actions, now entering its second decade, with no end in sight. US forces are still in Iraq, assassination drones attack Pakistan and Somalia, and Libya is being bombarded while a new western occupation is planned. The U.S. backs Israel's brutal occupation of Palestine, maintains 900 military bases around the world, and threatens Iran and other countries. Which country will be the next target of U.S. and U.S.-led wars?

These endless wars have terrible costs – lives lost; countries devastated; trillions of dollars spent resulting in service cuts, privatizations, and increased poverty; scapegoating Muslims and immigrants; and other wars at home on the Black, Latino, and Native communities.

The tiny minority who run the military-economic-industrial-financial machine are thriving while the rest of us increasingly struggle to get by. This has to end!
